

## Experience

### Google Keep Software Engineering Project

SEPT 2019 TO DEC. 2019

- Implemented forms and modals to save user note data
- Retrieve and send notes between archive and home page with Firebase data queries
- Agile meetings in a development team with sprint planning bi-weekly

### Scheduler Web App

JUNE 2021 TO PRESENT

- Organized user schedule items on a calendar using grid format and flexbox
- Embedded interactive UI with hover events to apply CSS effects in HTML
- Integrated selectable colors for task list by saving and loading color data in array
- Adjusted alignment between added task lists using inline-block over flexbox styles

### FoodsApp Android App (Developmental)

JUNE 2021 TO JULY 2021

- Designed dynamic layouts for "Menu" and "Order" screens using Flexbox styles
- Created multiple screen navigators by coding nested navigation logic
- Optimized performance with render call control and reducing re-renders

### Chat Room App Web App

MARCH 2021 TO MAY 2021

- Identified and fixed frontend UI issues using Chrome developer tools
- Rate comments with "Like" and "Dislike" syncing to each unique user in database
- Handled backend logic using array functions to sort parent and child IDs
- Improved latency by caching in data pipeline to reduce API calls

## Education

### Bachelor of Science in Computer Science

University of California,  
Riverside

SEPT. 2015 TO MARCH 2020

- Linear Algebra
- Web Development
- Software Engineering
- Data Structures & Algorithms

## Skills

### Coding Languages

- C#
- Javascript
- C++
- CSS/HTML

## Tools

- Node.js
- React.js
- Express.js
- React Native
- MySQL
- Firebase
- Git
- Heroku
